Topic: Positive Case of COVID-19 in District

October 26, 2020

Dear Lordstown parents, staff and community members:

Today, we received notification that a Lordstown Employee has tested positive for COVID-19. While we must protect the privacy of the person involved, we believe it is best to communicate transparently with you so you can make well-informed decisions for your family.

There is nothing more important to Lordstown Local Schools than the safety and health of our students, our staff and their families. We are working directly with county health officials to address this situation. They have recommended we share the following with you: This employee has had no contact with students and or staff and the Health Department and the District feels the situation has been contained to just this person.

Lordstown Local Schools will continue to follow all COVID-related safety procedures including proper hand hygiene, wearing a mask/face covering, keep six feet distance from others, and stay home if you're feeling sick. Along with the extra cleaning and disinfecting we have done on a regular basis to continue to put all our students in a safe environment. The health and safety of all students and staff remain our top concern. We are taking all of these steps to ensure that our schools remain safe, and our students stay healthy, and that you feel confident sending your children for in- person learning.

COVID-19 is transmitted through person-to-person contact and through the exchange of respiratory droplets. As more cases are being confirmed across the state, including in our community, it is important to be sensible, but to also be vigilant. Symptoms of COVID-19

include fever, cough and shortness of breath. If you or any member of your family exhibit these symptoms, please contact your medical provider for advice immediately. Symptoms usually appear 2-14 days after exposure.

The Centers for Disease Control and Prevention recommends the following best practices to help prevent the spread of COVID-19:

- Wash your hands often with soap and water for at least 20 seconds.
- Use alcohol-based hand sanitizer with at least 60% alcohol if soap and water are not available.
- Avoid close contact with those who are sick.
- Cover your coughs and sneezes with a tissue or your sleeve.
- Avoid touching your eyes, mouth and nose.
- Disinfect frequently touched surfaces and objects.
- Stay at home when you are sick.
- Practice social distancing, leaving at least six feet between you and other people.
- Wear a cloth mask in public when you cannot social distance.

Our greatest priority is the safety of our students, staff and community members. It is important to remember that children are greatly influenced by the reactions of adults when facing difficult circumstances. I encourage everyone to remain calm and to be empathic and respectful to those affected.

We are grateful for the opportunity to serve you and your family, especially as we face this challenging situation together. Thank you for your support of Lordstown Local Schools.

Sincerely,

Gregory T. Bonamase
Superintendent
